

TJOEPKE

Lightening up your world: portable light at home and on the go.

Here's the story

The next-generation lantern is here! Ideal for all kinds of situations and locations, Tjoepke brings light in the darkness, even with no power supply on hand. Romantic al fresco candlelit dinner but no candle? Tjoepke has a special flame-effect setting, and a breeze can't spoil the moment. It makes a stylish bedside light and is even light and portable enough to take out jogging. Going camping? Tjoepke is in the house... er, tent. Simply charge using the USB cable before you set off, or en route in the car.

Tjoepke offers bright and dimmed light, cool and warm light, and a candlelight effect. It can be used both indoors and outdoors. So many options, yet so simple to use. Turn upside down – hourglass style – to switch it on. Then use the button to adjust the brightness and light warmth as well as to activate the cozy flame effect. Quite simply illuminating. Brought to you by the bright sparks at Fatboy.
