

# STRIPESOL

fatboy.

Fatboy's big fat parasols make staying in the shade fun.

fatboy®

## Here's the story

Come rain or come shine, big parasols make life better. When the sun gives you too much heat or light, then Stripesol is the ultimate device to create a shade just where you want it. Thanks to a diameter of three-and-half meters and a variety of great colours, you are set for a cool spot in style.

Stripesol is a parasol that literally stands strong. The entire device is one to adore. A kingsize garden umbrella, simple to handle with a system as ingenious as strong. Just pull the typical Fatboy-red chord and the Stripesol unfolds, ready to stand firm and proud like a colourful landmark in your garden or patio. Noteworthy detail: the little flag on top whistles where the wind blows.

Go for the nostalgia look with a Stripesol in deep blush, or display your sense of good taste with a fashion statement in deep blue. With these two new inspiring colours added to the roster, there's more than plenty to choose from.
