

SUPERCHARGER 2.0

fatboy®

MANUAL

EN

Fatboy® product information Supercharger 2.0:

The Fatboy® Supercharger is a multicharger which can be used to charge from one up to twelve mobile Fatboy® lamps at one time. The supercharger has 12 built-in USB2.0 ports for connecting the USB cable supplied with the lamps. It is suitable for 100-240 VAC power supplies (50/60Hz).

WARNING: READ CAREFULLY BEFORE USE!

- For indoor use only.
- This charger is not a toy. Keep away from children.
- Make sure to connect the USB connectors correctly to avoid damage.
- Do not expose the charger to excessive heat sources.
- If the external cable of this device is damaged it should be replaced exclusively by Fatboy® the original B.V. in order to avoid a hazard.

Instructions for use:

- Make sure the charger is positioned on a straight and rigid surface.
- Make sure there is enough room to position the lamps, keep some space in between.
- Plug the main power cable into a 100-240 VAC (50/60Hz) power socket.
- Make sure you use the right USB cable with each lamp to avoid damage! Some lamps are using a Micro USB cable, other models are supplied with a USB Type-C cable. Be sure to use only the cable supplied with the lamp.

USB Type-C

Micro USB

- Operating temperature t_a 40°C.

Warning:

- Do not use force to connect the USB port to the supercharger or the small USB plug to the lamp. If it does not connect easily this could indicate:
 - The USB plug is not positioned correctly.
 - You are using a cable that is not corresponding with the lamp (Fatboy® uses 2 types of USB ports, Micro USB and USB Type-C).
 - The USB port or plug is damaged. Please check it for faults or damage and contact your local Fatboy® dealer if you find any issues.

Maintenance:

- When not in use for a longer periods, please ensure the charger is switched off.
- Make sure it is stored properly and remove the USB cable upfront.
- Disconnect the lamps from the supercharger after the charging had completed.

Trouble shooting:

- The USB cable doesn't fit my lamp: As Fatboy® is using two kinds of USB cables it is important to check you are using the correct cable before inserting it.
- One of the lamps is not charging:
 - Please check if another Supercharger USB port can charge the lamp. This could indicate one of the ports is damaged. Please contact your Fatboy® dealer.
 - Please check if the USB cable provided with the lamp is damaged. Either the cable or the USB connectors could be damaged. Please contact your Fatboy® dealer.
