

CAPPIES X NYNKE TYNAGEL

Thanks to interchangeable cappies, you can make your Edison the Petit or Mini your own. By using these lamps as a blank canvas, designer Nynke Tynagel has given the cappies a whole new dimension.

Here's the story

Sometimes pure simplicity hits the spot. Other times you want that something extra. It's why Edison the Petit and Edison the Mini have their own accessory line. With cappies in different print patterns, allowing you to make these table lamps your own. Easy to put on – and just as easy to remove. Throwing a different light on your day, every day.

Cappies as a canvas

Just like Fatboy, Nynke Tynagel has her own unique perspective on the world. Nynke sees every object as a blank canvas – and thus an ideal opportunity to reinvent it. She wanted to meld the cappies with Edison the Petit and Mini to add more than just an extra layer. Her solution: create a background that's the same color as the lamps and design structures that seem to emanate from the lamp itself. Basket weave looks like a woven cappie, Mikado places a subtle structure around the lamp and Serpentine converts it into an abstract 3D party. Very Nynke – and very Fatboy too.

Long-term collaboration

The cappies signal the start of a long-term collaboration between Nynke Tynagel and Fatboy. For over twenty years, Nynke was co-owner of renowned design studio Studio Job. Since 2020 she has been running her own studio which gives her free rein with her unique visual ideas, in every possible way: from textiles to furniture to buildings. "There are many similarities between my vision and Fatboy's," insists Nynke. "We both strive for the ultimate combination of fun and serious quality. Together we arrive at designs that I would never make on my own. And that's what effective collaboration is all about."

Nice to know!

- For indoor use.
- Material polypropylene.
- Packed in an envelope.
